

Make Warehouse Business Decisions That Matter: A Must-Have Checklist

On every day and in every moment, your warehouse creates data that you could use to make informed real-time decisions if you had the right warehouse business intelligence (BI) solution.

With this checklist, you can evaluate warehouse BI solutions to find the one that will help you focus on what's important to you and your organization.

Does the solution you're considering provide you with the ability to:

- View real-time site data
- Review and evaluate your site performance
- Manage end-to-end assets for any facility on any device
- Have zero downtime
- Receive live updates
- View all of your sites/facilities at a single glance and filter them by site
- View work progress
- View predictive work completion – The amount of time that you'll need to complete the tasks on hand
- View productivity metrics – See what associates are performing above average and then observe them to see why and utilize that information for targeted training to others
- Export and download any data for a presentation or report
- View a holistic system view of all work and resources
- View heat maps of your facilities
- View performance by lines
- View volume statistics by hour

LocusHub is our cloud-based, securely available, single pane of glass solution that offers tools, data, and solution management in one place. Think of it as ground control for your entire warehouse operations.
