

REAL ROI

Locus Robotics Customers Speak Out Across Industries

See how Locus Robotics is driving efficiency, productivity, and cost savings for businesses just like yours. The quotes below are from real-world customers that showcase the impressive return on investment (ROI) that they have achieved with the Locus solution.

RETAIL

"Productivity has been proven in units per hour (UPH) picked. The projected UPH is 25% higher than what had been initially planned."

"Across all sites we've consistently achieved a 2-3x productivity boost, along with a reduction in headcount, allowing us to reallocate resources to other areas within the company."

3PL

"We intended to have a throughput of 2,500 to 3,000 orders per day. During the peak season, we fulfilled 5,000 to 7,000 orders per day and increased our peak UPH to 136% with our cobots."

"Since going live, we've seen our baseline lines per hour (LPH) increase from around 40-45 to now consistently achieving 80-90 LPH, with some employees close to 100 LPH."

INDUSTRIAL

"Before using Locus, employees typically picked 20-40 lines per hour (LPH). Now, with the robots, some team members are picking over 100 LPH. So it's much faster."

"The bots have really helped our productivity and throughput. Before Locus, we were picking 30 SKUs per hour. After implementing Locus, we've increased our capacity to 80-100 SKUs per hour."

HEALTHCARE

"Productivity has increased by 200%, allowing us to complete the work much faster."

"In the six months after launching the bots, we saw a 54% increase in lines picked, enabling us to deliver products to customers at a higher speed."
